SUMMARY OF TESTING METHODS AND KEY FINDINGS

Medici generates the CDA file that is compliant to the NHSN for AUR reporting standard. Medici tracks every CDA file that is generated and exported. A steady count of CDA file export indicates normal usage and that it is functioning as expected.

STANDARDS UPDATES (INCLUDING STANDARDS VERSION ADVANCEMENT PROCESS (SVAP) AND UNITED STATES CORE DATA FOR INTEROPERABILITY (USCDI))

Yes, I have products certified with voluntary SVAP or USCDI standards. (If yes, please complete the table below).

No, none of my products include these voluntary standards

Care Setting(s)

Medici CDA files were tested for inpatient and outpatient acute care settings though the established NHSN pre-production test site. Being able to successfully submit test files to the test site ensures conformance to the latest CDA standards.

Metrics and Outcomes

Measurement /Metric	Associated Criterion(a)	Relied Upon Software (if applicable)	Outcomes	Challenges Encountered (if applicable)
Rate of Export	<ul style="list-style-type: none"> 170.315 (b)(10) Electronic Health Information Export 170.315 (f)(6) Transmission to Public Health Agencies – Antimicrobial Use and Resistance Reporting 	None	We measured an increasing rate of CDA exports that aligns with our growing customer base and application usage. There was consistent CDA exports every month indicating normal usage and function of the Medici application. Average monthly percentage increase was 16.1% which was higher than our expected 10% margin from month to month, which indicates an overall improving monthly trend for 2024.	None

KEY MILESTONES

Key Milestone	Care Setting	Date/Timeframe
Submitted RWT Plan for 2024	Inpatient, and outpatient acute care settings	10/15/2023
Collected data	Inpatient, and outpatient acute care settings	1/1/2024 – 12/31/2024
Submitted test results	Inpatient, and outpatient acute care settings	1/22/2025
